RABI LIGHT

Rabi Light is a very low sulphur, light crude produced in Gabon from the fields of Rabi, Coucal, Avocette, Tsingui, Ozainge and Ezanga.

COMMERCIAL

Volumes

Around 10.3 million barrels (all companies) in total per year are available for loading. Perenco equity oil is around 3.0 million barrels per year.

Marketing

Currently marketed by Perenco

LIFTINGS

Country: GABON

Terminal: Cap Lopez operated by Total Gabon

Location: Offshore terminal, northwest of Port Gentil

Loading Restriction: Terminal accepts vessels up to 330k DWT; max 160k DWT for 2nd port

Loading Rate: 12,000 m³/hour max.

Cargo Size: 650,000 bbl to 960,000 bbl

Note: Draft is restricted to 20.5 m

CRUDE OIL CHARACTERISTICS

General

Rabi Light is a “mixed character” 33.3 °API crude with low sulphur and acidity

Naphtha

14 vol% naphtha low in aromatics and suitable as feed for olefins production

Kerosene

10 vol% kerosene cut with good cold properties, low sulphur content, exceptional high smoke point and low in aromatics making it ideal feedstock for jet fuel production

Gasoil

19 vol% gasoil with remarkable cetane index and low density

VGO

33 vol% VGO, low in sulphur and density; excellent feedstock for FCC unit due to high paraffins content

Residue

23 vol% residue
