**CONGO / DJENO**

**DJENO**

Djeno is a medium sweet crude oil available at the Djeno Terminal offshore Congo. Congorep operates the Emeraude and Likouala oil fields which productions are blended into Djeno. Perenco Congo SA operates the PNGF South and KLL fields.

**COMMERCIAL**

Volumes 84 million barrels (all companies) in total per year, of which 11 million barrels per year are available from Perenco Marketing. Currently marketed by Perenco via spot tenders at a rate of 1 cargo of 920k bbl per month.

**LIFTINGS**

Country: CONGO

Terminal: Djeno Terminal operated by Total E&P Congo

Location: Onshore terminal 15km south of Pointe Noire

Loading Restriction: Offshore SBM suitable for VLCC up to 340k DWT (1st and 2nd port)

Loading Rate: 9,000 m³/hour

Cargo Size: 920,000 bbl

Note: Draft is restricted to 22.5 m (for LR2 vessel and VLCC)

**CRUDE OIL CHARACTERISTICS**

General: Djeno is a 26.4 °API heavy naphthenic crude low in sulphur

Naphtha: 13 vol% naphtha, suited for catalytic reforming feedstock with good N-2A

Kerosene: 11 vol% kerosene cut with high smoke point and good cold properties

Gasoil: 19 vol% gasoil easily meets marine fuel requirements; good cold properties

VGO: 31 vol% VGO with low wax content

Residue: 26 vol% residue with low sulphur and wax content, both suitable for fuel oil blending and bitumen production
