Leman South and Durango subsea assets successfully decommissioned

Perenco UK is pleased to announce the successful decommissioning of both the Leman South (53/02a-15Y) and the Durango (48/21a-4z) subsea assets in the Southern North Sea (SNS), within a single campaign framework resulting in the plugging and abandonment (P&A) of the wells and the removal of the associated subsea infrastructure.

The work was completed in collaboration with Petrodec, the specialist in integrated solutions for decommissioning and part of the Dixstone group. The highly complex operations were conducted safely and to the agreed timeframe using Petrodec's HAEVA jack up vessel. This campaign built on recent experience gained from the Gawain, Arthur and Davy subsea abandonment projects, which were also completed using the HAEVA.

Perenco UK SNS Managing Director, Jo White, added:

"The Leman South and Durango campaigns were not routine P&A projects. They demonstrated Perenco's ability to deliver repeatable, large-scale, technically complex subsea well abandonment and infrastructure recovery using an innovative single campaign approach centred on Petrodec's HAEVA, rather than relying exclusively on high-cost drilling rigs and standalone offshore projects. I would like to thank our partners and the Perenco team who were involved in delivering some of the most technically demanding subsea well abandonment activities undertaken in the SNS."

About Perenco UK

Perenco UK is a leading provider of energy to the UK. It has been present in the UK Southern North Sea Basin (SNS) since 2003 and has operated Europe's largest onshore oil field at Wytch Farm since 2011. In the North Sea, Perenco UK processes almost 15% of the UK national gas production. It owns and operates the largest infrastructure on the UKCS, comprising 32 offshore installations, 12 subsea wells, and a network of more than 2,000 km of pipelines connected to its two onshore terminals at Bacton and Dimlington where the gas is received, treated, metered and then exported into the UK National Grid. Perenco UK produces approximately 50,000 BOEPD, of which approximately 10,000 barrels is from Wytch Farm, in which Perenco UK holds a 95% share. Perenco UK adheres to the highest operating standards and supports economic growth and social development wherever it works. Perenco UK is part of Perenco, which operates in 12 partner countries, and is one of a group of several companies in the energy sector owned by the Perrodo family.
